

**“WHAT’S MOST  
IMPORTANT TO ME  
IS YOUR HEALTH.”**

**– YOUR PHARMACIST**

# *Your health is our speciality.*

Your pharmacist is there to advise and support you throughout your entire medication treatment. It's your health, so you have the freedom to choose who your pharmacist will be!

Your particular insurance plan determines the amount you owe when you purchase your medications. While your insurer reimburses your claims, it also tries to control costs.

We as pharmacists are not insurances specialists. But to make things easier for you, we forward your claims to your insurer.

If you have any questions about your insurance plan, please address them to your insurer. When it comes to your health, however, trust your pharmacist to help you.

After all, it's our speciality.
